

Press Release

Zurich, 3 March - 2008

International Java Technology Conference announces tutorial program

Kick-off Jazoon'08: free Java community tutorials

On June 23, a comprehensive tutorial program forms the pre-conference of the 3-day Jazoon'08 conference which will last until June 26 in Sihlcity, Zurich. In four tutorials conference participants can profit from interactive networking and intense exchange of experience with experts. Interested people are invited to take part in the Java community tutorials of Roman Strobl and Jérôme Dochez free of charge.

Jazoon'08 features top speakers of the Java community. The focus of the conference are latest trends in Java technology presented by well-known national and international experts. The pre-conference starts on June 23, 2008 between 9am and 7pm with Java community tutorials free of charge presented by Roman Strobl and Jérôme Dochez from Sun Microsystems.

Tutorials with Sun Microsystems experts

Roman Strobl is a renowned expert in software development in the field of Java and dynamic languages and produces among other things the NetBeans Podcast. His tutorial about the NetBeans Java IDE will be completed by members of the NetBeans Team who will present new features of NetBeans 6.0. Additionally, a variety of applications of Rich Internet Applications software as well as mobile tools for mobile phones and PDAs will be focused upon.

Jérôme Dochez, Senior Staff Engineer at Sun Microsystems, is GlassFish architect and will lead through the GlassFish Community Day. He imparts his knowledge about projects like GlassFish Application Server, Metro Web Services Stack, Jersey, OpenDS, OpenPortal, OpenESB, OpenSSO or jMaki.

The audience will be offered the opportunity to personally get to know the developers of these projects.

More information and details on the tutorial program can be found online

<http://jazoon.com/en/conference/tutorials.html>.

Angelika Langer and Ted Neward for the afternoon program

The afternoon program will take place between 4pm and 7pm. Angelika Langer, author of numerous books and articles on C++ and Java, and Ted Neward, internationally renowned top speaker will talk about Java Generics and Groovy.

The tutorials are "Mob Programming Sessions", where the speakers will do programming spontaneously according to requests from the participants. Alternative solutions, pitfalls and recommended techniques will be revealed.

Interested parties who register early for the afternoon tutorials or for Jazoon'08, are granted reduced early bird conditions until April 30, 2008 on <http://jazoon.com>.

On Jazoon

Jazoon is the International Conference on Java Technology in Zurich. It targets software developers and –architects, IT decision-makers and consultants from all over the world. From June 23 until June 26, 2008 the conference will take place for the second time in Sihlcity Zurich. Jazoon fosters personal contacts beyond technical, geographical and cultural borders. Keynode AG (producer), Netcetera AG (technology partner) and cR Kommunikation AG (Marketing & Communication) guarantee professional quality and a convincing implementation.

Jazoon is supported by Sun Microsystems (Schweiz) AG und Elca Informatik AG (platinum sponsors), AdNovum Informatik AG (gold sponsor), Google und Canoo Engineering AG (silber sponsors), as well as the Java User Group Switzerland (partner).
